

A Christmas message: "... There is no greater power than love. It overcomes the hate how light overcomes the darkness. "(Martin Luther King Jr.)

Thank you for trusting us 2017!

2017 has passed quickly and the requirements placed on modern production, manufacturing and quality systems are changing just as quickly.

Our promise to you: We will gladly support you in 2018 too as a competent partner with all our know-how and our modern developments in the field of weld seam detection and inspection, thickness measurement, material testing, double sheet control etc. in solving your challenges.

It is said that wishes come true at Christmas time! That is why we wish you and your families good luck, happiness and health, as well as a Happy New Year!

Your team from ROLAND ELECTRONIC GmbH

**Non-destructive Material Testing,
 Thickness Measurement, Double Sheet
 Detection and more ...**

**Weld Seam Detection System
 SND40 - for tubes, profiles, coils and flat
 materials as well as for cables and wires**

**3D - Weld Seam Inspection High-End
 Laser technology for tubes, profiles, coils
 and flat materials**

We are closed for Christmas: from december 23. 2017 until january 01. 2018
Last order acceptance in 2017: Friday, december 15. 2017

ABOUT US

We develop, produce and distribute highly specialized systems for factory automation and quality control since 1965. Our sensors and controllers solve tasks that are not solvable with standard sensors.

TECHNOLOGIES

Our core competencies are: Magnetic Flux, Eddy Current and Induction. With these technologies, we build sensors for very special detection tasks. We apply latest laser technology where the advantages of optical technology are required.
